TAB

Recommendation B. 5.

1.   We concur in this recommendation.

2.   This has been largely accomplished.  The processing of
     incoming requests for routine name checks now average
     2.8 working days.  The processing of the outgoing replies
     to these requests now average 3.8 working days, but it is
     expected that this figure will shortly be reduced to 3
     days.  The "processing" of such replies in this case refers
     to final processing.  In any case involving a deadline, or
     whenever the time element is important, the field office is
     invariably advised by an interim teletype.
